Data Science Technology graduate from Universitas Airlangga with internship experience in Business Intelligence, focusing on data analysis, forecasting, and data visualization. Proficient in Python, SQL, Power BI, Excel, and statistical modeling, with experience working with business and time-series data. Developed forecasting models and interactive dashboards to transform data into actionable insights for data-driven decision making.

Work Experiences

PT BFI Finance Tbk – Tangerang, Indonesia

Jul 2025 – Aug 2025

Business Intelligence – Intern

BFI Finance is a publicly listed Indonesian multifinance company serving consumer and SME financing segments through 200+ outlets nationwide.

- Analyzed daily booking data from a car financing product using SQL and Python to support booking value forecasting and trend analysis.
- Developed XGBoost and rule-based forecasting approaches and built a Power BI dashboard to visualize booking value and trends.
- Presented the forecasting results and dashboard through a project report and presentation, explaining analytical findings and model outputs to stakeholders.
- Tools: SQL, Python, PowerBI.

Organizational Experiences

Innovative Research on Intelligent System (IRIS) – Universitas Airlangga

Feb – Dec 2025

Researcher

- Contributed to research activities focused on applying data science, artificial intelligence, and technology to real-world problems.
- Collaborated with fellow researchers in conducting research, developing proposed solutions, and exploring innovative approaches to address identified problems.
- Contributed as a UI Designer to a web-based logistics tracking system project, implementing user interfaces using HTML and CSS for warehouse, driver, customer, and administrator workflows.

Himpunan Mahasiswa Teknologi Sains Data (HIMATESDA) – Universitas Airlangga

Jan – Dec 2024

Head of Talent Escalation Division (ESKAT)

- Led the Talent Escalation Division in developing students' interests and non-academic skills within the Data Science and Technology student community.
- Planned and executed programs that encouraged student participation in competitions, communities, and creative activities.
- Supervised division members and coordinated internal activities and reporting to ensure effective program execution.

Badan Eksekutif Mahasiswa Fakultas Teknologi Maju dan Multidisiplin – Universitas Airlangga

Feb – Dec 2023

Staff, Ministry of Social Affairs, Community Service & Environment

- Contributed to the planning and execution of various educational, environmental, and community initiatives within the faculty.
- Served as Person in Charge (PIC) for FTMM Solar Rays, coordinating a solar energy education program through socialization and hands-on activities at SMAN 15 Surabaya.
- Led the Logistics Division for Aimology 2023, a national-level competition organized by FTMM, coordinating logistical preparation and event-day operations.

Education Level

Universitas Airlangga – Surabaya, Indonesia

Aug 2022 – Jul 2026

Bachelor of Data Science

- CGPA: 3.60/4.00
- Thesis: Forecasting Shallot and Garlic Prices in Central Java Traditional Markets using ARIMAX, SVR, and Hybrid ARIMAX-SVR; SVR achieved the best forecasting performance across both commodities.

Projects

Forecasting Shallot and Garlic Prices in Central Java Traditional Markets (Thesis)

Jan 2025 – Jul 2026

- Forecasted shallot and garlic prices using 1,826 daily observations per commodity from PIHPS, incorporating wholesale prices, chili prices, and rainfall.
- Developed ARIMAX, SVR, and Hybrid ARIMAX-SVR models in Python with preprocessing, feature engineering, hyperparameter tuning, and PFI to evaluate variable contributions.
- SVR achieved the best forecasting performance, with MAPE of 3.354% for shallots and 2.364% for garlic, while wholesale prices were the most influential exogenous variables in forecasting accuracy.

Positioning Analysis of Maybank Sharia in Indonesia's Islamic Banking Market

Apr – May 2025

- Evaluated Maybank Syariah's market positioning and brand awareness against competing Islamic banks using Google Trends and customer reviews collected through SerpAPI from Jan 2024–Apr 2025.
- Scraped and preprocessed customer reviews from 10 Maybank Syariah branches, then analyzed brand awareness through Google Trends and performed Aspect-Based Sentiment Analysis (ABSA) across service, queue, product, facility, and digital service aspects.
- Found that negative public sentiment was concentrated on face-to-face service and queue management, with additional concerns around product access, branch facilities, and digital services, informing recommendations to improve service efficiency and digital customer experience.

Queue System Analysis at Kopi Kenangan Mulyosari

Sept – Dec 2024

- Analyzed customer arrival and service patterns during weekday and weekend peak hours to evaluate queue efficiency using observational data from a single-channel, single-phase service system.

- Applied exponential distribution testing and queueing analysis to estimate arrival rate, service rate, waiting time, system utilization, and other key performance indicators.
- Found higher system utilization on weekends (39.1% vs. 23.8% on weekdays) and longer average waiting time (3.26 vs. 1.65 minutes), leading to recommendations for improving service efficiency during peak periods.

EvacHub: Disaster Information and Evacuation Management System

Sept – Dec 2024

- Developed a data warehouse to integrate disaster, evacuation, and logistics data for centralized monitoring and decision support.
- Designed star schema and implemented ETL using Pentaho and MySQL, integrating data on disasters, evacuees, camps, inventory, and logistics distribution.
- Built an interactive HTML/CSS/JavaScript dashboard with SQL queries and Chart.js to monitor active/closed disasters, evacuee demographics, camp capacity, and logistics inventory.

Skills, Certifications, and Other Experiences

- Technical Skills: Python, SQL, R, Microsoft Excel, Google Sheets, Power BI, Tableau, Data Visualization, Statistical Analysis, SPSS, RStudio.
- Certifications: Data Analyst – DQLab (Digital Talent Academy) (Aug 2026); Associate Data Scientist & Data Scientist Supervisor – Digital Talent Academy (Aug 2026); Artificial Intelligence – AWS (Digital Talent Academy) (Aug 2026).
- Languages: English (Intermediate – English Language Proficiency Test 450/677), Bahasa Indonesia (Native).
